

IN THE CLAIMS

1. A method of therapeutic treatment of a disease which is triggered or stimulated by Alpha B Crystallin, comprising administering a therapeutic agent comprising Alpha B crystallin or at least a specific immunogenic part thereof as a therapeutic agent to act against the disease.

2. The method of treatment according to claim 3, wherein the disease is an auto-immune disease.

3. The method according to claim 3, wherein the disease is multiple sclerosis.

4. The method of claim 3, wherein the treatment acts to induce tolerance against alpha B crystallin.
